Information about the Multiple Myeloma Rounds Program

We are pleased to announce that the Multiple Myeloma Rounds program will be coming to the Atlanta area in 2017!

Several medical centers in the Atlanta area have partnered together to develop this series of CME/CE accredited activities related to key issues in treating patients with multiple myeloma.

Each of the live activities will focus on a different topic regarding current issues facing healthcare providers who treat patients with multiple myeloma. Actual relevant case studies that will provide an expert-led critical analysis of the most pertinent clinical trial data and perspectives on the utilization of optimal treatment options in therapeutic strategies for patients with multiple myeloma will be included in each of the programs.

We are pleased that the Leukemia Research Foundation (LRF) and the Amyloidosis Foundation are endorsing partners of this program.
